Managing Risk in Business and Daily Life

Course Description

This course is designed specifically for secondary school students who are interested in understanding and effectively managing risks in various aspects of their lives. The course explores the fundamental concepts of risk management with a focus on both business and personal contexts. Students will develop practical skills and knowledge to identify, analyze, and mitigate risks in today's dynamic and interconnected world.

Throughout the course, students will engage in interactive discussions, case studies, and practical exercises to reinforce their understanding of risk management concepts. By the end of the course, students will have gained valuable insights into managing risks in both business and daily life, empowering them to make informed decisions and navigate uncertainties with confidence.

Topics

- Internet in Daily Life
- Network Security
- Risk Analysis and Control
- Identifying Business System Risk
- Business System Continuity Planning

Grading Scheme

- Class attendance (10%)
- Class participation and discussion (30%)
- 5 Group assignments (8% each)
